

Initial Site Assessment

An Initial Site Assessment (ISA) is a document that summarizes hazardous material information for a minor (CatEx) roadway project or for acquisition of property where there is little reason to expect such materials to be present. An ISA requires a site reconnaissance and a search of local records regarding drug lab enforcement activities.

Guidance: American Society for Testing of Materials (ASTM) Standard Practice for Environmental Site Assessments: Transaction Screening Process, CDOT Right-of-Way Manual

Form: CDOT Form 881, ISA Checklist
