Archaeological Resources

Archaeology is the scientific study of historic or prehistoric peoples and their cultures by analysis of their artifacts, inscriptions, monuments, and other such remains. Archaeological resources are the material remains of past human life or activities which are of archaeological interest.

In Colorado, prehistoric resources date to the time before sustained European contact with Native American populations. Historic archaeological resources are locations with remains from the historic period since European settlement.

Archaeological resources found within State Highway right-of-way belong to the State of Colorado. In compliance with Federal and State laws, the Colorado Department of Transportation endeavors to avoid adverse effects to significant archaeological remains when undertaking highway improvements.
