## Noxious Weed Priority Lists

The Colorado Department of Agriculture (CDA) maintains three lists of noxious weed species, as follows:

- **List A** – The Commissioner of Agriculture has designated these 18\* species for eradication.
- **List B** – These 39\* species need to be managed to stop their continued spread.
- **List C** – These 14\* species are already widespread, but the State provides education, research and biological control resources to assist local governments that choose to require their management.

\*Numbers are subject to change. Additionally, individual counties have their own priority lists.

The Colorado Department of Transportation manages noxious weeds on its right-of-way.
