

Common Crupina

(*Crupina vulgaris*)

The Colorado Noxious Weed Act requires every landowner to **eradicate this weed** wherever it is found on his or her property. The Colorado Department of Transportation controls these weeds on its right-of-way.

Common crupina is a winter annual that grows 1 to 3 feet tall. The leaves are alternate, finely dissected, and develop short, stiff spines along the edges. Flowers are pink to purple and grow one to two on a branch. Each plant has several branches and up to 40 flowering heads.

Small infestations can be managed by hand pulling the plants when the soil is moist. More details about this species and appropriate herbicides to control it are available online at <http://www.colorado.gov/ag/weeds>.
