**Gunnison's Prairie Dog
(Cynomys gunisonii)**

Federal status: Candidate for listing
Colorado status: Not listed

This rodent grows to an adult height of 12 to 15 inches and a weight of 23 to 42 ounces. The dorsal color is yellowish buff intermixed with black hairs. Compared with other prairie dogs species, Gunnison's has a much shorter and lighter color tail, and the hairs in the distal half of the tail are grayish-white, rather than pure white.

Habitat: This species inhabits shortgrass and medium grass prairie in central and south-central Colorado, and statewide in New Mexico. It is found in a wide elevation range from 6,000 to 11,000 feet in 20 Colorado counties
