## Northern Redbelly Dace (*Phoxinus eos*)

Federal status: Not listed  
Colorado status: Endangered

This small fish grows to less than 3 inches long. It has an olive to brown-colored back. Two dark bands run along each side with metallic silver stripe above and pale band between. During spawning, the undersides of the males turn orange or red, with yellowish fins.

**Habitat:** This species inhabits slow-moving, cool-water streams, spring-fed streams and ponds with sandy bottoms and aquatic vegetation. In Colorado, the only known population is in the West Plum Creek drainage near Castle Rock
