20th Street Bridge Construction Work August 14 through Mid-September , 2015

As part of the US 36 Express Lanes Project, rehabilitation of the 20th Street Bridge (shown in red below) is now underway. This work will require the single lane on the bridge to be narrowed and shifted to accommodate the bridge construction on Mondays through Fridays. The bridge and I-25 Express Lanes will also be closed to the public during weekend work periods. Work is scheduled to begin on Friday, August 14 at 8 p.m., and will continue through mid-September. Most of this work will require crews to work on the weekends beginning at 8 p.m. on Fridays and ending at 5 a.m. on Mondays. Please be advised that some of the work may be disruptive and that the bridge will have a rough riding surface until the project is complete. If night work is necessary, it will be limited to a specific distance away from any residents. For all Rockies home games, the structure will remain open to outbound traffic for two hours after the game ends. We appreciate your patience.

For more information go to www.us36expresslanes.com or call the project hotline at 303-404-7042.
