

Q: How many days a week are construction crews planning to work?

A: 6-day workweek

Q: Why did we pick September as opposed to October, Nov., etc.?

A: Don't want to miss a lot of the construction season. Looking at the impacts and duration, timing would be to minimize the impacts.

Q: Do you work much at night to minimize impacts?

A: Yes, there will be night work. They can't blast during the night for safety issues, but can do clean up and some preparation work. Yes, when we can, we will do a lot of night work.

Elizabeth (Visit Estes)

Q: When do you think you'll make the decision for option A, B, or C? Would love to poll business partners in Estes to see which option they prefer.

A: We have some time, but that time is now. Please get with Carla Perez so we can help facilitate those polls.

Q: Option A is saying 11 months, but you've also suggested it could be up to 3 years?

A: No, the 11 months is only for Package 1. All 5 Construction Packages would take 3 years. Option A is only Package 1.

Q: Is Oct.-March or Nov.-April an option for construction work? September is one of the busier tourist months.

Q: Signage that goes up in Loveland. Visit Estes Park would like to continue the adequate signage indicating that Rocky Mountain National Park is open. When tourists see detours and other construction activities, start to assume RMNP is closed.

A: Yes, working with PIO to continue signage.
