Highway 9

Traffic Impacts End for 2005 Construction Season

SUMMIT COUNTY – The Colorado Department of Transportation (CDOT) has suspended major construction operations on the State Highway 9 project in the Breckenridge area for the winter.

Demobilization is underway and drivers still may encounter some minor traffic stops for the next several days for truck hauling operations but major traffic stops have ceased.

CDOT is suspending construction to minimize traffic impacts for travelers during the winter recreational season. On-road construction is scheduled to resume in mid-April 2006.
