

I-25: The New Pueblo Freeway

Ilex Street to City Center Drive

PROJECT UPDATE

NOTICE OF LANE REDUCTION

EXPECT NARROW LANES, DELAYS ON INDIANA STREET UNDER I-25

The Colorado Department of Transportation (CDOT) and contractor Flatiron Constructors, Inc. will temporarily reduce lane widths on Indiana Street under Interstate 25 in Pueblo for approximately four weeks for bridge lead abatement work.

Work is scheduled to begin on Wednesday, Sept. 30, and continuing into late October.

While construction hours are from 7:30 a.m. to 6:30 p.m., motorists on Indiana Street can expect a reduction of the travel lanes to 11 feet that will remain in place 24/7 during the four-week period. Access to all nearby businesses, including the Pueblo Steel Mill, will be maintained. Traffic delays are expected and alternate routes are advised.

In addition, the phasing of the lead abatement on these bridges will require a single weekend special operation on Oct. 17 and 18. This will require traffic to be reduced to one-lane, with flaggers alternating traffic on Indiana between 7:30 a.m. and 6:30 p.m.

The I-25 Ilex Street to City Center Drive project is the first project of the New Pueblo Freeway: the reconstruction of I-25 between City Center Drive (1st Street) and Ilex Street through downtown Pueblo. Construction includes upgrading a number of bridges south of downtown. The project began in July 2015, and is expected to be completed in late 2017. Normal work hours are from 7 a.m. to 5 p.m., Monday through Friday, with nighttime and weekend work as needed.
