## **APPENDIX H**

### **FINAL EIS PUBLIC REVIEW DOCUMENTATION**

---

The following items pertaining to the public involvement efforts for the three public hearings for the Final EIS are included in this appendix:

- ▶ Federal Register notice of availability (2 pages)
- ▶ Federal Register notice of extension (2 pages)
- ▶ Newspaper announcements—English & Spanish (2 pages)
- ▶ Verifications of publication (newspapers; 17pages)
- ▶ Fact sheet (2 pages)
- ▶ Press release (2 pages)
- ▶ Public comment form (1 page)
- ▶ Public hearing presentation material (Powerpoint slides; 9 pages)
- ▶ Public hearing transcripts
  - Southwest Weld County Service Center, Longmont – September 12, 2011 (8 pages)
  - Longmont Public Library, Longmont – September 13, 2011 (4 pages)
  - The Ranch, Loveland – September 15, 2011 (5 pages)
- ▶ Final EIS distribution transmittals
  - TAC Members (40 pages)
  - Municipalities (24 pages)
  - Counties (2 pages)
  - Agencies (15 pages)
- ▶ Final EIS distribution letters
  - Municipalities (8 pages)
  - Agencies (8 pages)
  - Tribes (14 pages)

**This Page Left Intentionally Blank.**

The mandatory information is reported using standardized forms and annual reports, and the regulations are codified at 40 CFR Parts 144 through 148. The data are used by UIC authorities to ensure the protection of underground sources of drinking water.

**Burden Statement:** The annual public reporting and recordkeeping burden for this collection of information is estimated to average 2.32 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:

*Estimated total number of potential respondents:* 53,772.

*Frequency of response:* annual, semi-annual, and quarterly.

*Estimated total average number of responses for each respondent:* 10.39.

*Estimated total annual burden hours:* 1,296,167 hours.

*Estimated total annual costs:* \$194,842,061. This includes an estimated burden cost of \$54,384,103 and an estimated cost of \$140,457,959 for capital investment or maintenance and operational costs.

**Are there changes in the estimates from the last approval?**

There is an increase of 233,836 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This increase reflects a variety of adjustments and program changes. Most of the burden increase is due to increases in the inventory of injection wells and the number of permit applications and mechanical integrity tests submitted by operators and reviewed by permitting authorities. Other changes and adjustments relate to reduced activities associated with the Florida Class I Rule and the 1999 Class V Rule, addition of burden associated with the 2010 Class VI Rule, granting of

primacy to two Tribes, and burden reduction associated with electronic reporting via the National UIC database.

**What is the next step in the process for this ICR?**

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT.**

**ENVIRONMENTAL PROTECTION AGENCY**

[ER-FRL-8999-6]

**Environmental Impacts Statements; Notice of Availability**

*Responsible Agency:* Office of Federal Activities, General Information (202) 564-1399 or <http://www.epa.gov/compliance/nepa/>.

Weekly receipt of Environmental Impact Statements  
Filed 08/08/2011 Through 08/12/2011  
Pursuant to 40 CFR 1506.9.

**Notice**

In accordance with Section 309(a) of the Clean Air Act, EPA is required to make its comments on EISs issued by other Federal agencies public. Historically, EPA met this mandate by publishing weekly notices of availability of EPA comments, which includes a brief summary of EPA's comment letters, in the **Federal Register**. Since February 2008, EPA has included its comment letters on EISs on its Web site at: <http://www.epa.gov/compliance/nepa/eisdata.html>. Including the entire EIS comment letters on the Web site satisfies the Section 309(a) requirement to make EPA's comments on EISs available to the public. Accordingly, on March 31, 2010, EPA discontinued the publication of the notice of availability of EPA comments in the **Federal Register**.

EIS No. 20110259, Draft EIS, FHWA, FL, Crosstown Parkway Extension Project, New Bridge Crossing of the North Fork St. Lucie River Crosstown Parkway from Manth Lane to U.S. 1, St. Lucie County, FL, Comment Period Ends: 10/03/2011, Contact: Cathy Kendall 850-553-2225.

BILLING CODE 6560-50-P

## ENVIRONMENTAL PROTECTION AGENCY

[FRL-9454-4]

### Notice of Regional Waiver Pursuant to Section 1605 (Buy American Requirement) of the American Recovery and Reinvestment Act of 2009, to Mason County, WA

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** The Regional Administrator of EPA Region 10 is hereby granting a waiver request from the Buy American requirements of ARRA Section 1605 under the authority of Section 1605(b)(1). This waiver request is being granted because EPA believes it is in the public interest to allow Mason County, Washington (the County) to utilize and install six specific turbo aeration blower units as part of the County's Belfair Wastewater and Water Reclamation Facilities project. This is a project specific waiver and only applies to the use of the specified product for the ARRA project being proposed. Any other ARRA recipient that wishes to use the same product must apply for a separate waiver based on project specific circumstances. The Membrane Bioreactor (MBR) system was selected and procured by the County in 2008 using non-ARRA funding and prior to enactment of ARRA. However, since the MBR equipment is being installed by an ARRA funded contract, the new Buy American requirements of ARRA apply. As ARRA was enacted after the County's procurement actions, the County could not be aware of the need to purchase and install a Buy American compliant MBR system and could not reasonably foresee the need for a waiver.

Requiring the installation of domestically manufactured turbo aeration blower units will extend the time frame of the project significantly (by at least four months), due to the redesign, procurement, submittal delivery, submittal review, fabrication, delivery, and replacement of the aeration blower installation at the construction site. Redesign, reconstruction, and replacement of the blowers will likely cost at least an additional \$620,000 and could also void the three year manufacturer warranty for the MBR that is valid only if system components identified in the manufacturer's proposal are utilized. A significant delay in the project schedule could push the project past the anticipated September 2011 project completion into the fall rainy season, and could cause runoff over areas of

failing septic systems and pose a risk to environmental and water quality protection. This additional cost and delay is inconsistent with the public interest, and a waiver of the Buy American provisions in these circumstances is justified. This action allows the installation of the six specified turbo aeration blower units that have already been delivered to the construction site as noted in Mason County's May 27, 2011, request and additional follow up documentation.

**DATES:** *Effective Date:* August 9, 2011.

**FOR FURTHER INFORMATION CONTACT:** Bryan Fiedorczyk, CWSRF ARRA Program Management Analyst, Grants and Strategic Planning Unit, Office of Water & Watersheds (OWW), (206) 553-0506, U.S. EPA Region 10 (OWW-137), 1200 Sixth Avenue, Suite 900, Seattle, WA 98101.

**SUPPLEMENTARY INFORMATION:** In accordance with ARRA Section 1605(c), the EPA hereby provides notice that it is granting a project waiver of the requirements of Section 1605(a) of Public Law 111-5, Buy American requirements, to Mason County, Washington, for the utilization and installation of six specific turbo aeration blower units as part of the County's Belfair Wastewater and Water Reclamation Facilities project. Based on the information provided by the County and its consultant project manager, EPA has determined that it is inconsistent with the public interest for the County to further delay the project and incur significant additional costs to pursue the purchase and installation of domestic manufactured turbo aeration blower units.

Section 1605 of the ARRA requires that none of the appropriated funds may be used for the construction, alteration, maintenance, or repair of a public building or a public works project unless all of the iron, steel, and manufactured goods used in the project are produced in the United States, or unless a waiver is provided to the recipient by the head of the appropriate agency, in this case, the EPA. A waiver may be provided under Section 1605(b) if EPA determines that (1) applying these requirements would be inconsistent with the public interest; (2) iron, steel, and the relevant manufactured goods are not produced in the United States in sufficient and reasonably available quantities and of a satisfactory quality; or (3) inclusion of iron, steel, and the relevant manufactured goods produced in the United States will increase the cost of the overall project by more than 25 percent.

**Are there changes in the estimates from the last approval?**

Primarily, the decrease in burden is due to finalizing the MACT standards for new and existing industrial, commercial, and institutional boilers and process heaters at major source facilities. Therefore our revised estimate of burden is smaller than that estimated in the last ICR.

**What is the next step in the process for this ICR?**

EPA will consider any comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

Dated: September 1, 2011.

**ENVIRONMENTAL PROTECTION AGENCY**

[FRL-9461-5]

**Underground Injection Control Program; Hazardous Waste Injection Restrictions; Petition for Exemption—Class I Hazardous Waste Injection; Great Lakes Chemical Corporation, El Dorado, AR**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice of a final decision on a no migration petition reissuance.

**SUMMARY:** Notice is hereby given that a reissuance of an exemption to the land disposal restrictions, under the 1984 Hazardous and Solid Waste Amendments to the Resource Conservation and Recovery Act, has been granted to Great Lakes Chemical Corporation for two Class I injection wells located at El Dorado, Arkansas. The company has adequately demonstrated to the satisfaction of the Environmental Protection Agency by the petition and supporting documentation that, to a reasonable degree of certainty, there will be no migration of hazardous constituents from the injection zone for as long as the waste remains hazardous. This final decision allows the continued underground injection by Great Lakes, of the specific restricted hazardous wastes identified in this exemption, into Class I hazardous waste injection wells No. WDW-5 and WDW-6 at the El Dorado, Arkansas facility until December 31, 2017, unless EPA moves to terminate this exemption. Additional conditions included in this final decision may be reviewed by contacting the Region 6 Ground Water/UIC Section. A public notice was issued July 7, 2011. The public comment period closed on August 22, 2011. No comments were received. This decision constitutes final Agency action and there is no Administrative appeal. This decision may be reviewed/appealed in compliance with the Administrative Procedure Act.

**DATES:** This action is effective as of August 31, 2011.

**ADDRESSES:** Copies of the petition and all pertinent information relating thereto are on file at the following location: Environmental Protection Agency, Region 6, Water Quality Protection Division, Source Water Protection Branch (6WQ-S), 1445 Ross Avenue, Dallas, Texas 75202-2733.

**FOR FURTHER INFORMATION CONTACT:** Philip Dellinger, Chief Ground Water/UIC Section, EPA—Region 6, telephone (214) 665-7150.

Dated: August 31, 2011.

**FARM CREDIT SYSTEM INSURANCE CORPORATION**

**Farm Credit System Insurance Corporation Board; Regular Meeting**

**SUMMARY:** Notice is hereby given of the regular meeting of the Farm Credit System Insurance Corporation Board (Board).

**DATE AND TIME:** The meeting of the Board will be held at the offices of the Farm Credit Administration in McLean, Virginia, on September 8, 2011, from 1 p.m. until such time as the Board concludes its business.

**FOR FURTHER INFORMATION CONTACT:** Dale L. Aultman, Secretary to the Farm Credit System Insurance Corporation Board, (703) 883-4009, TTY (703) 883-4056.

**ADDRESSES:** Farm Credit System Insurance Corporation, 1501 Farm Credit Drive, McLean, Virginia 22102.

**SUPPLEMENTARY INFORMATION:** Parts of this meeting of the Board will be open to the public (limited space available) and parts will be closed to the public. In order to increase the accessibility to Board meetings, persons requiring assistance should make arrangements in advance. The matters to be considered at the meeting are:

**Closed Session**

- FCSIC Report on System Performance

**Open Session**

*A. Approval of Minutes*

- June 21, 2011

*B. Business Reports*

- FCSIC Quarterly Financial Reports
- Report on Insured and Other Obligations
- Quarterly Report on Annual Performance Plan

*C. New Business*

- Annual Performance Plan FY 2012-2013
- Proposed 2012 and 2013 Budgets
- Insurance Fund Progress Review and Setting of Premium Range Guidance for 2012

**Join the North I-25 Environmental Impact Statement (EIS) Project Team for public hearings on the North I-25 Final EIS!**  
**The Colorado Department of Transportation (CDOT) is pleased to announce the availability of the Final EIS. The Final EIS identifies and evaluates multi-modal transportation improvements from the Fort Collins-Wellington area to Denver.**

**Public Hearings:** Three (3) public hearings to receive verbal and written comments on the Final EIS will be held. All of the public hearings will take place from **4:30 p.m. to 7 p.m.** at the following locations:

- Sept. 12:** Southwest Weld County Service Center, Large Meeting Room, 4209 Weld County Rd. 24½, Longmont (I-25 Exit 240)
- Sept. 13:** Longmont Public Library, Meeting Rooms A & B, 409 4th Ave., Longmont
- Sept. 15:** The Ranch (Budweiser Events Center), Exhibit Rooms B & C, 5260 Arena Circle, Loveland (I-25 Exit 259)

The format for each of the public hearings will include an open house from 4:30 p.m. to 7 p.m. with a brief presentation beginning at 5:30 p.m. with an opportunity to comment. The project team will be available before and after the presentation for questions and clarification.

## Mark Your Calendars PUBLIC HEARINGS IN SEPTEMBER

**PUBLIC REVIEW LOCATIONS:** THE FINAL EIS IS AVAILABLE FOR PUBLIC REVIEW AT THE FOLLOWING LOCATIONS BEGINNING AUG. 19, 2011:

Berthoud Town Hall	328 Massachusetts Ave.	Berthoud
Brighton City Hall	22 S. 4th Ave.	Brighton
CDOT Headquarters*	4201 E. Arkansas Ave.	Denver
CDOT Region 4 Headquarters*	1420 2nd St.	Greeley

Appendix H-7

NORTH I-25  
 EIS

information. cooperation. transportation.

**Únase al Equipo del Proyecto de la Declaración de Impacto Ambiental (EIS, en inglés) de la I-25 Norte para participar de las reuniones públicas sobre la Versión Final del EIS para la I-25 Norte.**

**El Departamento de Transporte de Colorado (CDOT) se complace en anunciar la disponibilidad de la Versión Final del EIS, en la que se identifican y evalúan las mejoras de transporte multimodal entre el área de Fort Collins-Wellington hasta Denver.**

**Audiencias públicas:** Se han planificado tres (3) audiencias públicas para recibir comentarios verbales y por escritos de la Versión Final del EIS. Todas las audiencias públicas serán de **4:30 p.m. a 7 p.m.** en las siguientes direcciones:

**12 de sept.:** Southwest Weld County Service Center, Sala de Reuniones Grande, 4209 Weld County Rd. 24½, Longmont (I-25 Salida 240)

**13 de sept.:** Longmont Public Library, Sala de Reuniones A y B, 409 4th Ave., Longmont

**15 de sept.:** The Ranch (Budweiser Events Center), Sala de Exhibiciones B y C, 5260 Arena Circle, Loveland (I-25 Salida 259)

El formato de cada audiencia incluye una sesión informativa de 4:30 p.m. a 7 p.m., una breve presentación a las 5:30 p.m. y oportunidades para comentarios. El equipo del proyecto estará disponible antes y después de la presentación para responder a preguntas y ofrecer aclaraciones.

## Marque su calendario AUDIENCIAS PÚBLICAS EN SEPTIEMBRE

**SITIOS DE CONSULTA PARA EL PÚBLICO:** LA VERSIÓN FINAL DEL EIS ESTARÁ DISPONIBLE A PARTIR DEL 19 DE AGOSTO DEL 2011 EN LAS SIGUIENTES DIRECCIONES:

Berthoud Town Hall	328 Massachusetts Ave.	Berthoud
Brighton City Hall	22 S. 4th Ave.	Brighton
CDOT Headquarters*	4201 E. Arkansas Ave.	Denver

## North I-25 Environmental Impact Statement

Wellington to Denver

August 2011

### UPCOMING PUBLIC HEARINGS

The Colorado Department of Transportation will host three public hearings in September to gather feedback on the Final Environmental Impact Statement. All meetings will take place from 4:30 p.m. to 7 p.m. with a brief presentation at 5:30 p.m. and an opportunity to comment publicly.

September 12, 2011- Southwest Weld County Building: 4209 Weld County Road 24 1/2 (I-25 exit #240)

September 13, 2011- Longmont Public Library: 409 4th Avenue in Longmont

September 15, 2011- The Ranch (Budweiser Events Center): 5290 Arena Circle (I-25 exit #259)

### Project Overview

The Federal Highway Administration (FHWA), in cooperation with the Colorado Department of Transportation (CDOT), is completing an Environmental Impact Statement (EIS) to identify and evaluate multi-modal transportation improvements along approximately 60 miles of the I-25 corridor from the Fort Collins-Wellington area to Denver. The EIS addresses regional and inter-regional movement of people, goods and services along I-25.

### Preferred Alternative

Over the past year, CDOT has been working closely with FHWA and local agencies to identify a preferred alternative. With guidance from public comments submitted on the Draft Environmental Impact Statement (DEIS) and an extensive collaborative effort, a preferred alternative has been identified which will include the following elements:

- General Purpose Lanes – one new general purpose lane in each direction of I-25 between SH 66 and SH 14.
- Tolerated Express Lanes (TEL) – one buffer-separated TEL in each direction of I-25 from the existing HOV/Express Toll lanes at approximately 84th Avenue north to SH 14.

- Interchanges - 13 I-25 interchanges will be upgraded.
- Express Bus – Express bus with 13 stations along I-25, US 34 and Harmony Road with service from Fort Collins and Greeley to downtown Denver and DIA.
- Commuter Rail – Commuter rail service with nine stations connecting Fort Collins to Longmont using the Burlington Northern Santa Fe Railroad right-of-way, generally paralleling SH 119 then County Road 7 and tying into FasTracks North Metro line in Thornton, providing service to downtown Denver. Passengers may also connect to the FasTracks Northwest line in Longmont, which will travel to Boulder.
- Commuter Bus – Commuter bus service with eight stations along US 85 connecting Greeley to downtown Denver.
- Congestion Management- Improvements include accommodations for ridesharing, carpools and vanpools, along with additional bicycle and pedestrian facilities. In addition, signal timing, ramp metering on I-25 and signage will also be improved.

### Frequently Asked Questions

**Q.** When will we have an opportunity to review the Final EIS?

**A.** The North I-25 Final EIS will be available for public review and comment for a 30-day period from mid-August to mid-September. During this time, the public hearings listed above will be held to gather feedback.

*Continued on page 2*

# FACT SHEET

## North I-25 Environmental Impact Statement

Wellington to Denver

August 2011

**Q.** What does the Final EIS include?

**A.** The Final EIS includes a detailed evaluation of the three build alternatives including Package A, Package B and the Preferred Alternative. A phased approach for implementation of the Preferred Alternative will also be included. The Preferred Alternative and Phase 1 are shown on the project website at <http://www.coloradodot.info/projects/north-i-25-eis>

**Q.** What is a Record of Decision (ROD)?

**A.** The Record of Decision for North I-25 is a document that will describe the transportation improvements that have been selected by CDOT and FHWA for the first phase of implementation.

**Q.** What is the North I-25 ROD expected to include?

**A.** A final decision on what to include in the North I-25 ROD will be made after the Final EIS public comment period. It is currently anticipated that Phase 1, as identified in the Final EIS, will be selected for implementation in the ROD.

**Q.** When will the North I-25 ROD be completed?

**A.** The ROD is expected to be signed by CDOT and FHWA in Fall 2011.

**Q.** When will construction begin?

**A.** To accommodate current funding limitations, CDOT and FHWA anticipate constructing the improvements in phases over time. CDOT is already moving forward with preliminary design of two northern sections of I-25 improvements. At this time, construction funding has not been identified.

### Staying Informed

For the latest information about the project, visit <http://www.coloradodot.info/projects/north-i-25-eis>

## **CDOT RELEASES THE NORTH I-25 FINAL ENVIRONMENTAL IMPACT STATEMENT, SEEKING PUBLIC INPUT**

**GREELEY** – Today, August 19<sup>th</sup>, the Colorado Department of Transportation (CDOT) released the North I-25 Final Environmental Impact Statement (FEIS) for a 30-day comment period in order to collect public input on the Preferred Alternative and the phased implementation approach for the Preferred Alternative.

The purpose of the study is to identify reasonable transportation improvements that will address mobility, accessibility, safety, and the aging infrastructure along I-25 while providing more transportation choices. The Preferred Alternative was identified with guidance from public comments submitted on the Draft Environmental Impact Statement (DEIS) and an extensive collaborative effort with local agencies.

“We’ve had a tremendous amount of public involvement and cooperation from local agencies throughout the process,” said CDOT Region Transportation Director Johnny Olson. “Through the collaborative effort, we have identified a Preferred Alternative that will enhance mobility and support continued growth throughout northern Colorado.”

The Preferred Alternative includes the following elements:

- **General Purposes Lanes-** One new general purpose lane in each direction of I-25 between State Highway (SH) 66 and SH 14.
- **Tolled Express Lanes (TEL)-** One buffer-separated TEL in each direction of I-25 from the existing HOV/Express Toll Lanes at approximately 84<sup>th</sup> Avenue in Denver to SH 14.
- **Interchange Upgrades-** Upgrades 13 interchanges along I-25.
- **Express Bus-** Express bus with 13 stations along I-25, US 34 and Harmony Road with service from Fort Collins and Greeley to downtown Denver and DIA.
- **Commuter Rail-** Commuter rail service with nine stations connecting Fort Collins to Longmont using the Burlington Northern Santa Fe Railroad right-of-way, generally paralleling SH 119 then County Road 7 and tying into FasTracks North Metro line in Thornton, providing service to downtown Denver. Passengers may also connect to the FasTracks Northwest line in Longmont, which will travel to Boulder.
- **Commuter Bus-** Commuter bus service with eight stations and stops along US 85 connecting Greeley to downtown Denver.

- **Congestion Management**- Includes accommodations for ridesharing, carpools and vanpools along with additional bicycle and pedestrian facilities. In addition, signal timing, ramp metering on I-25, and signage will also be improved.

“Through strong partnerships with local agencies and the Federal Highway Administration, we have been able to make significant improvements to the North I-25 corridor in recent years,” said CDOT Region Transportation Director Johnny Olson. “However, we know this multi-modal solution and the system quality of I-25 are essential to the future of transportation in northern Colorado. We are approaching the end of the environmental process and need input from the public before we prepare a Record of Decision and look for funding opportunities to move the solution into construction.”

During the 30-day comment period from August 19, 2011 through September 19, 2011, the FEIS can be viewed at 26 locations along the corridor and in Denver (list of locations attached). In addition, CDOT will host three public hearings in September to allow members of the community to review and comment on the FEIS. All hearings will take place from 4:30 p.m. to 7 p.m. with a brief presentation and an opportunity for public comment beginning at 5:30 p.m. The public hearings will be held at the following locations:

- **September 12, 2011:** Southwest Weld County Building- 4209 Weld County Road 24 ½, Longmont
- **September 13, 2011:** Longmont Public Library - 409 4<sup>th</sup> Avenue, Longmont
- **September 15, 2011:** The Ranch (Budweiser Event Center)- 5290 Arena Circle, Loveland

Those who are unable to attend the public hearings are encouraged to submit written comments via the project website at <http://www.coloradodot.info/projects/north-i-25-eis>, by facsimile (303-721-0832) or by mail to: North I-25 Project Team, c/o Tom Anzia, Felsburg Holt & Ullevig, 6300 S. Syracuse Way, Suite 600, Centennial, CO 80111.

Following the 30-day comment period and the public hearings, CDOT and the Federal Highway Administration (FHWA) will issue a Record of Decision (ROD), which is expected to take place in the fall of 2011. Due to funding limitations, the full Preferred Alternative will likely be constructed in phases over time. The ROD will include the transportation improvements selected by CDOT and FHWA for the first phase of construction.

Updates about the study and other CDOT projects can be found on the CDOT website at [www.coloradodot.info](http://www.coloradodot.info).

NORTH I-25  
EIS  
information. cooperation. transportation.

# WELCOME

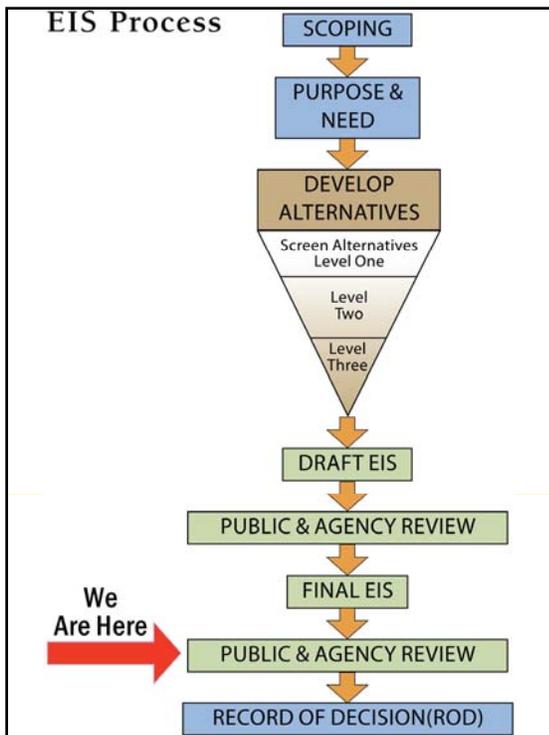

to the  
North I-25 Final EIS  
Public Hearing

## North I-25 EIS

### Lead Agencies

- Federal Highway Administration (FHWA)
- Colorado Department of Transportation (CDOT)

NORTH I-25  
EIS  
information. cooperation. transportation.

### Purpose & Need

NORTH I-25  
EIS  
information. cooperation. transportation.

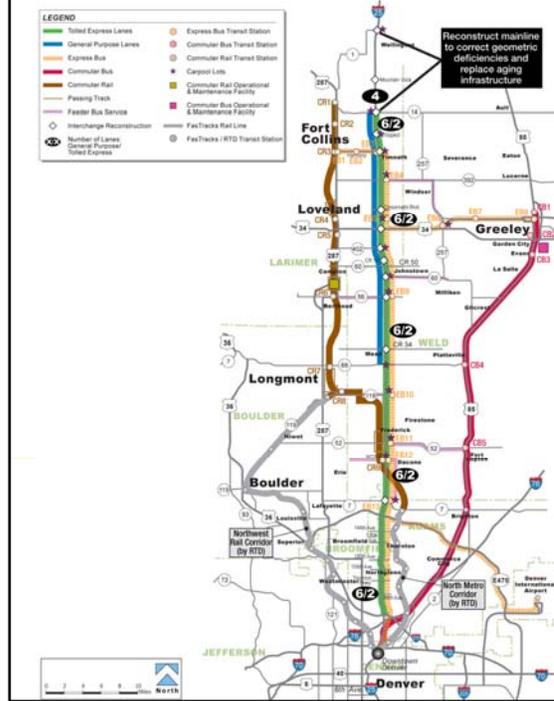

- **PURPOSE**  
Meet long-term travel needs between the Denver metropolitan area and the rapidly growing population centers along the I-25 corridor north to the Fort Collins-Wellington area.
- **NEEDS**
  - Safety Concerns
  - Aging Infrastructure
  - Mobility & Accessibility
  - Modal Alternatives

## Developing the Preferred Alternative

- Evaluation of the No-Action Alternative, Package A and Package B in the Draft EIS
- Public and agency comments on Draft EIS considered
- Collaborative decision making process to achieve broad community support
- Reached consensus among the 45 communities and agencies

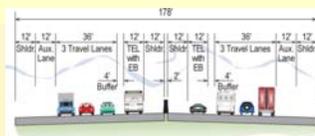

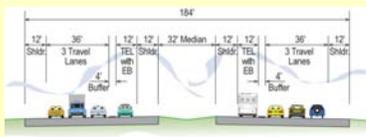

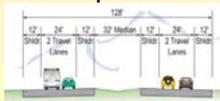

## Preferred Alternative

## Preferred Alternative

### I-25 General Purpose Lanes and Tolled Express Lanes

## Preferred Alternative

### Commuter Rail

- 9 stations
- Single track with passing track
- Operating plan
  - Every 30 minutes during AM and PM peak periods
  - Every 60 minutes during off peak
  - Hours of operation: 4 AM to 1:30 AM
- Maintenance facility in Berthoud
- Feeder bus service provided to commuter rail stations

## Preferred Alternative

### Express Bus

- 13 stations
- Operating Plan
  - 8 buses per hour peak period
    - 7 to downtown Denver
    - 1 to DIA
  - 2 buses per hour off peak
    - 1 to downtown Denver
    - 1 to DIA
- Maintenance facility in Greeley

## Preferred Alternative

### Commuter Bus

- 5 stations
- Operating plan
  - 60 minutes off-peak service
- Maintenance facility in Greeley

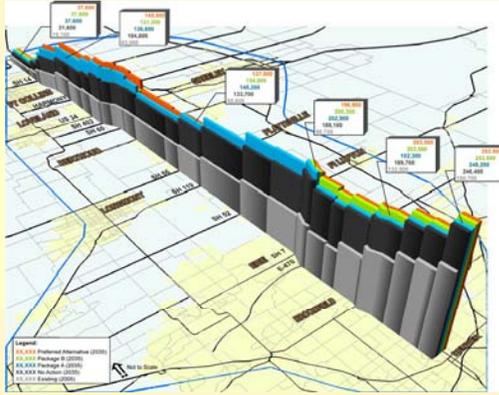

## Evaluation of the Preferred Alternative

## Transportation Findings

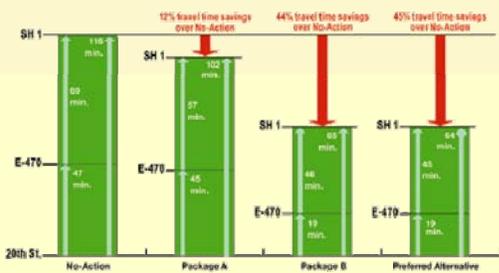

## Daily Traffic Volume Comparison

## Mobility and Accessibility I-25 General Purpose Lane Travel Time Comparison

## Tolled Express Lane Travel Time Comparison

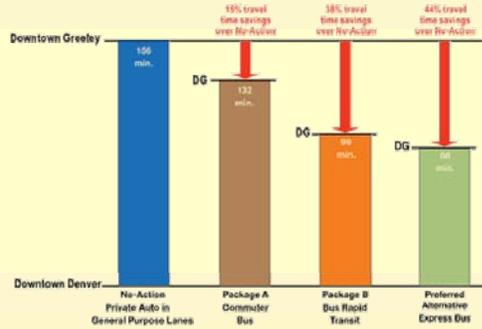

## Transit Travel Time Comparison

## Transit Travel Time Comparison

Greeley to Denver

## Modal Alternatives

	Package A	Package B	Preferred Alternative
Modal Options	-Auto -Commuter Bus -Commuter Rail	- Auto - Carpool/ Vanpool - Bus Rapid Transit	- Auto - Carpool/ Vanpool - Express Bus -Commuter Bus -Commuter Rail
Ridership	5,850	6,800	6,500

## Infrastructure

- 94 new structures with the Preferred Alternative
- 87 new structures with Package A
- 94 new structures with Package B
- All of the alternatives would replace pavement that has exceeded its useful life

## Safety

	No Action	Package A	Package B	Preferred Alternative
Annual Crashes	3,975	4,238	4,061	4,399
Crashes/VMT	1.41	1.33	1.32	1.37
Arterial VMT (million miles)	35.74	35.10	35.45	35.07
Transit Safety (annual injuries)	NA	8	24	11

## Environmental Findings

NORTH I-25  
EIS  
information. cooperation. transportation.

## Preferred Alternative Environmental Impacts

- Least impact to key natural resources
  - Wetlands
  - Preble's meadow jumping mouse
- Impact to residential areas in Longmont
  - More than Package B but there are clear mobility benefits
  - Less than Package A

NORTH I-25  
EIS  
information. cooperation. transportation.

## Preferred Alternative Environmental Impacts

- Least overall harm to historic properties and parks
- Land Use Goals
  - More supportive than Package B
- Mitigation
  - Appropriate mitigation identified to address impacts
  - Wetland mitigation is being developed at St. Vrain State Park

NORTH I-25  
EIS  
information. cooperation. transportation.

## Cost and Funding

NORTH I-25  
EIS  
information. cooperation. transportation.

## Capital Costs (2009 dollars)

- Preferred Alternative: \$2.178 billion
  - \$141 M: Express Bus
  - \$12 M: US 85 Commuter Bus
  - \$649 M: Commuter Rail
  - \$1.403B: I-25 TEL/GP
- Funding
  - Based on current sources
  - \$688.4 million between now and 2035

## Identification of Phasing

## Phasing Plan

- Current funding is not sufficient to implement the entire project
- Collaborative decision making process
- Numerous phasing plans evaluated
- Consensus was reached on a 3-phase plan
- Projects in Phase 2 or Phase 3 could be moved up if funding becomes available

## Phase 1

## Next Steps

- Prepare Record of Decision (ROD) including responses to public comments
- Continue coordination with communities through design efforts
- Current design projects include:
  - SH 56 to SH 66
  - SH 392 to SH 14
  - Fort Lupton park and ride
  - Evans park and ride

## Public Comment

- Public Review
  - Through October 3<sup>rd</sup>
  - Hardcopy available at 26 locations
- Public Hearing
  - Sept 12 - Southwest Weld County
  - Sept 13 – Longmont Public Library
  - Sept 15 – The Ranch - Loveland (I-25 & US 34)
- Web Access
  - Throughout review period

## EIS Public Review Locations

North I-25 Final EIS Public Comments  
Southwest Weld County Service Center  
4209 Weld County Road 24 1/2  
Longmont, Colorado  
September 12, 2011.

1                   \*       \*       \*       \*       \*       \*

2                                   PUBLIC COMMENTS

3                   MR. LINDSAY: Hi. My name is Dave Lindsay. I'm  
4 the town engineer for the Town of Firestone.

5                   I was at the very first TAC meeting many years  
6 ago. We really do appreciate the effort that CDOT and the  
7 consulting staff has gone through. We appreciate the  
8 participation that we've been allowed to have in the input  
9 towards the solution.

10                  Mayor Chad Auer wanted to be at this meeting  
11 tonight, but he had a conflict and just was not able to  
12 come. We had prepared a letter that we've already sent  
13 actually with comments and support for the project. I  
14 would like to read that into the record very quickly.  
15 It's a brief letter. It was addressed to Tom Anzia at  
16 Felsburg Holt & Ullevig.

17                  "Mr. Anzia, the Town of Firestone has reviewed  
18 the north I-25 Final Environmental Impact Statement and  
19 supports the recommendation of the Preferred Alternative.  
20 The final EIS, seven years and \$22 million in the making,  
21 presents a thorough and complete evaluation of alternative  
22 solutions to the northern Front Range's pending  
23 transportation needs in compliance with need for  
24 requirements.

25                  Some of the key elements of the Preferred

1 Alternative that garner our support are: The Plan  
2 addresses the major issue of I-25 congestion with a blend  
3 of improvements to the interstate to increased capacity  
4 and travel efficiency.

5           The Plan will also provide a safer travel  
6 corridor. The Plan will replace critical infrastructure  
7 that is rapidly deteriorating or is technologically  
8 inferior, which also provides a safer travel corridor.

9           The Plan incorporates innovative managed lanes  
10 for vehicular traffic, bus service, as well as a future  
11 commuter rail system, which combines to give commuters a  
12 full venue of transportation options currently not  
13 available throughout most of the northern Front Range.

14           The Plan accommodates the least impact to  
15 existing wetlands and wildlife habitat of the alternatives  
16 that address the traffic problem on I-25.

17           The Phase 1 improvements address the most  
18 immediate and critical issues in the I-25 corridor while  
19 laying the groundwork for future phases that will fully  
20 develop the Plan's well-rounded transportation solution.

21           I-25 is the main street of the Northern Front  
22 Range, and the Preferred Alternative preserves this  
23 critical component of the region's continued success.  
24 Business leaders frequently list efficient and effective  
25 transportation as being a key element in determining where

1 to locate, relocate or expand.

2           The addition of alternative transportation modes  
3 can also enhance the quality of life of residents of the  
4 region which helps retain and recruit the best and  
5 brightest workforce.

6           We look forward to the Record of Decision and  
7 CDOT's expedient completion of the Phase 1 improvements.

8           Sincerely, Chad Auer, Mayor."

9           Thank you.

10           MS. BERSCH: I'm Linda Bersch from Loveland,  
11 Colorado, private citizen. I also thank you for your  
12 efforts in completing this study. I'm very happy to see  
13 the final draft. I have a couple of comments.

14           I would very much like to see the commuter rail  
15 established sooner rather than later and moved into Phase  
16 1. I spent almost 30 years commuting from Loveland to  
17 Denver to work, so I have some experience on I-25.

18           As soon as you build another lane, it's full.  
19 Fortunately, most of my commuting I was able to carpool or  
20 vanpool and noticed that most of the traffic is one person  
21 per car, so I think alternatives to car travel is sorely  
22 needed so that people can do something besides use their  
23 own car.

24           Commuter rail in Phase 1 would be a good  
25 alternative to cars and more cars. The railway would also

1 serve people along the 287 corridor. A lot of people do  
2 commute long that corridor for work as well as along I-25  
3 and would also serve the people living and working in that  
4 area and for people even going on into Denver. It doesn't  
5 force those people to use the feeder roads out to I-25.  
6 They can stay in the core areas of our cities along 287  
7 and the rail route.

8 I have one other comment on the express bus. The  
9 stops, as I see it on the map, go from Windsor -- Fort  
10 Collins, Windsor, Crossroads Boulevard, and then  
11 Berthoud. It seems to me like a stop at 34 or 402 would  
12 be more conducive to the commuters that would be using  
13 that bus rather than on Crossroads Boulevard.

14 I live along 402, and that 402 park-n-ride is  
15 overflowing almost every day. The more you build, the  
16 more overflow it creates, so I would think that  
17 considering the congestion at Crossroads Boulevard and the  
18 lack of available vacant land there, that a bus stop  
19 using the existing park-n-rides at 34 or 402 would be  
20 better served for the people.

21 Thank you so very much.

22 MR. ELMQUIST: Good evening. As a tenant farmer  
23 that lives along I-25 next to Stevenson Lexus, I'm here  
24 tonight to talk about a few issues that remain from the  
25 reconstruction of I-25 recently in which one lane was

1 added in each direction. This is just a word of -- some  
2 good comments that I want to relay to some of the CDOT  
3 staff here in which I'm concerned about in the design  
4 phase of that project, that adequate designing and efforts  
5 were not made to work with landowners and tenant farmers  
6 in addressing some of the irrigation reconstruction  
7 issues, and some of those issues still remain today. And  
8 this is a word of warning to some here in the audience  
9 that I will be contacting them yet to see what can be done  
10 about some of the lingering issues.

11 I'm concerned about the consultant that was hired  
12 to redesign the irrigation system and would hope in the  
13 future as you go about doing future projects to the north  
14 that you find somebody that is much more competent in  
15 designing irrigation systems, because the consultant that  
16 was hired certainly wasn't. We still have remaining  
17 issues.

18 What I think is important also in the process  
19 then is also working more closely with the County and the  
20 towns in which when you reconstruct these roads and make  
21 changes to drainage ways and such, you're not always  
22 actively coordinating and cooperating with the counties  
23 and towns, and they need to be aware of some of the  
24 impacts that those changes along I-25 will have to the  
25 adjacent roadways.

1           So I appreciate your opportunity to allow me to  
2 speak on those issues tonight and thank you, and I do  
3 support, obviously, the project and think it is very much  
4 needed; that we need to do upgrades obviously but have  
5 these concerns and think it is important that they be  
6 given some weight.

7           Thank you.

PUBLIC COMMENTS

MR. OSBORNE: My name is Rob Osborne. My address is 207 West Mrytle Ct., Fort Collins, Colorado, and I'm a restaurant owner. I'm not a traffic engineer by any means, but I do have the railroad come by my business every day, day in and day out, time and time again. So it certainly has made me think about rail transportation.

And now that this EIS report has come out for final comment period, I wanted to express my wish to speed up the passenger rail component and see if there was any way that that could be put in the Phase 1 project development.

And I imagine financing, money is the main issue with that. And as a citizen I wonder what citizens can do to help bring that about, expedited in a quicker fashion so that we don't have to wait until our kids' kids see passenger rail along the Front Range.

And the other concern that I have is, I've been in Colorado for almost 35 years now, and it seems to me the good part of the time I-25 is under construction, which is well it should be, it needs to be maintained, but in the process, of course, it is a hazardous drive when a lane is reduced and so on and so forth.

And if there is going to be 94 structural

1 improvements and repaving the highway and adding lanes, it  
2 sure would be great to have an alternative to having to  
3 take the highway, and certainly, you know, a bus option  
4 going down 287 might be something.

5           But if I had my wishes, it would be developing  
6 that passenger rail component sooner, and I think that the  
7 benefit that would come from that would be tremendous.

8           I also realize that passenger rail is something  
9 that needs to be subsidized by government in one form or  
10 fashion in order to maintain it. It's rare that ridership  
11 will pay for the actual cost of running a passenger rail  
12 system, and so I realize that's a big concern, too.

13           I would hope that there is a way that the Public  
14 could get involved in that, and there would be a way that  
15 we could increase that -- improve on that timeline, and so  
16 I would certainly be open and wanting to hear what the  
17 department, CDOT would have as far as suggestions there.

18           Thank you.

North I-25 Final EIS Public Comments  
The Ranch (Budweiser Events Center)  
I-25 & US 34  
Loveland, Colorado  
September 15, 2011.

1                   \*     \*     \*     \*     \*     \*

2                   PUBLIC COMMENTS

3                   MS. FORTUNE: I get to talk longer. I really  
4 only have this much (indicating).

5                   My name is Irene Fortune. I live at 4830 Avon  
6 Avenue in Loveland 80538, and I support the commuter rail  
7 component in this study for the reason that it provides  
8 reliable transportation, and if the ridership turns out to  
9 be much larger than what the numbers we see here are,  
10 which is my prediction looking at other rail systems in  
11 the country, then I would also expect to see improvement  
12 in air quality and road condition.

13                  But mostly I support it for health and safety  
14 reasons for the people in this region. I've worked in the  
15 highly hazardous chemical production industry for 30  
16 years, and I am completely convinced of the rewards that  
17 I've gotten are won by planning for safety.

18                  And so I do defensive driving on the roads. I do  
19 defensive driving times ten on my bicycle, and I'm worried  
20 because I see population projections continuing to arise  
21 around here, and I foresee that the roads will get busier  
22 and busier regardless how many lanes are added on I-25 and  
23 287 and 85 and the roads in between.

24                  And then I consulted the National Safety Council  
25 and learned that as of 2009 the average American had a 1

1 in 90 chance of getting injured in a motor vehicle  
2 accident, to the extent they need medical attention, and  
3 that's each year.

4           Worse, the motor vehicle crashes are the leading  
5 cause of death from ages 2 through 39 and ages 50 through  
6 72, and according to the National Safety Council, the  
7 total cost of accidents in 2009 was 245 billion. And I  
8 was horrified. And then I thought, hey, let me try to  
9 ratio that down to, like, the north Front Range area  
10 because we've got about 200,000 people here, give or  
11 take.

12           I didn't know how to factor in the Fort Collins  
13 with the safest driving record, so I just did a straight  
14 calculation, and I came up with a hit for our region of  
15 160, 170 million each year, and to me that's a horrifying  
16 number.

17           And I'm kind of looking at CDOT people and the  
18 transportation people to see if I'm right or an order of  
19 magnitude off. Okay. I'm sticking with it.

20           Then I went to a CDOT study, and that the actual  
21 injury rate for rail passengers was better than three  
22 times less than the injury rate for motor vehicle  
23 occupants, and that's good news.

24           So I predict if we had a significant -- if the  
25 people here had a significantly less riskier way to

1 travel, plus the quieter and safer roads that you could  
2 get with the computer rail construction, according to this  
3 chart here, then the benefit that families and employers  
4 would get in this region will go far beyond the dollar  
5 investment for computer rail.

6 Thank you.

		FEIS Volumes 1-3
		FEIS Alternatives Development & Screening Report/All Technical Reports
		FEIS Package Concept Plans

*Dear North I-25 TAC Members:*

Enclosed please find an electronic copy of the North I-25 FEIS which is to be made available for public review starting August 19, 2011. The 30 calendar day public review period concludes on September 19, 2011. In the interest of conservation, we are forwarding one electronic copy of the documents noted above to each municipality on our TAC list. Please share this copy with other representatives of your municipality that may have interest in reviewing and commenting on this document.

You are reminded that this document has also been used for consultation purposes on the effects to historic properties. If your local historic representative is interested in participating in the resolution of adverse effects, please have them contact Carol Parr at CDOT (970.350.2170).

An electronic version of the comment form will be made available for your use on the project website at [www.cdot.info/northi25eis/](http://www.cdot.info/northi25eis/). You may also submit comments on your agency letterhead. Your input is valuable to us. Please complete this form and mail directly to: Tom Anzia, Felsburg Holt & Ullevig, 6300 S. Syracuse Way, Suite 6300, Centennial, CO 80111. Comments may also be submitted online at the project website. Comments will be accepted from August 19<sup>th</sup>, 2011 to September 19<sup>th</sup>, 2011. Additional information is available on the project website at [www.cdot.info/northi25eis/](http://www.cdot.info/northi25eis/), including the time and locations of the upcoming public hearings. We look forward to receiving your comments on this important document. Thanks.

Fort Lupton, CO 80621

**RE: North I-25 Final Environmental Impact Statement and Draft Programmatic Agreement**

Dear Mr. Hodges,

Transmitted with this letter is the Documentation for Finding of Adverse Effect for the Colorado Department of Transportation (CDOT) and Federal Highway Administration (FHWA) North I-25 EIS. The properties that CDOT and FHWA believe will be adversely affected are: the Loudon Ditch (5LR.8930), Hingley Farm (5WL.5263), and Jillson Farm (5WL.6564).

The Notice of Availability for the North I-25 Final Environmental Impact Statement (FEIS) will be published on August 19, 2011. Enclosed please find a CD of the entire document. Enclosed also is a draft of the Programmatic Agreement that addresses the resolution of adverse effects. We are providing this information to you as a Consulting Party under the Section 106 document substitution process.

In 2003, the CDOT, the Federal Transit Administration (FTA) and FHWA agreed together with the Colorado State Historical Preservation Officer (SHPO) to substitute the project's National Environmental Policy Act (NEPA) documents (Draft EIS and Final EIS) in lieu of separate documentation, in order to accomplish the Section 106 consultation process on effects. The document substitution process is intended to reduce the time and complexity of the review process involving your office and other Section 106 consulting parties, by providing detailed information about project impacts associated with the various alternatives in the EIS rather than additional documents that may not be as effective for consulting on alternatives.

Since the Draft EIS was approved, the FTA decided to be a cooperating agency instead of a lead agency. The Final EIS includes a preferred alternative, which is a combination of elements from Packages A and B that were evaluated in the Draft EIS. The Final EIS is the documentation used for consultation on the effects of the Preferred Alternative. Previous steps in the document substitution process, as applied for the North I-25 EIS include:

1. Identification of the Area of Potential Effect
2. Identification of properties eligible for inclusion on the NRHP
3. Submittal of survey reports and site forms to SHPO and to the Section 106 Consulting Parties with eligibility determinations, concurrence achieved.
4. Submittal of determinations of effect in the Draft EIS for Packages A and B.
5. Response to SHPO and consulting parties comments on the effects for Packages A and B, documented in the Final EIS.
6. Completion of determinations of effect for all packages (A, B and Preferred Alternative).

*"Taking Care To Get You There"*

Mr. Hodges  
August 11, 2011  
Page 2

All Section 106 consulting parties now have the opportunity to review and comment upon the determinations of effect and proposed mitigation measures for all alternatives in the Final EIS. This information is contained in Section 3.15 of the attached CD. The deadline for comments is September 19, 2011. Any disagreements will be addressed prior to approval of a Record of Decision.

Resolution of adverse effects will be documented in a Programmatic Agreement, a draft of which is attached. Due to the long term nature of implementing the Preferred Alternative, continued consultation will be needed.

CDOT and FHWA invite your participation for resolving adverse effects in the Programmatic Agreement (PA) being prepared. If you would like to participate in the preparation of this PA or to be added as a signatory, please contact me.

If you have any questions or concerns, please notify me at 970-350-2170.

Sincerely,

A handwritten signature in black ink, appearing to read "CH Parr".

**Subject:** Notification of Adverse effects on the North I-25 Final Environmental Impact Statement (FEIS)

Dear Mr. Fowler:

Transmitted with this letter is the Documentation for Finding of Adverse Effect for the Colorado Department of Transportation (CDOT) and Federal Highway Administration (FHWA) North I-25 EIS. The properties that CDO T and FHWA believe will be adversely affected are: the Loudon Ditch (5LR.8930), Hingley Farm (5WL.5263), and the Jillson Farm (5WL.6564).

In 2003, the CDOT, the Federal Transit Administration (FTA) and FHWA agreed together with the Colorado State Historical Preservation Officer (SHPO) to substitute the project's National Environmental Policy Act (NEPA) documents (Draft EIS and Final EIS) in lieu of separate documentation, in order to accomplish the Section 106 consultation process on effects. The document substitution process is intended to reduce the time and complexity of the review process involving the SHPO and other Section 106 consulting parties, by providing detailed information about project impacts associated with the various alternatives in the EIS rather than additional documents that may not be as effective for consulting on alternatives.

Since the Draft EIS was approved, the FTA decided to be a cooperating agency instead of a lead agency. The Final EIS includes a preferred alternative, which is a combination of elements from Packages A and B that were evaluated in the Draft EIS. The Final EIS is the documentation used for consultation on the effects of the Preferred Alternative. Previous steps in the document substitution process, as applied for the North I-25 EIS include:

1. Identification of the Area of Potential Effect
2. Identification of properties eligible for inclusion on the NRHP
3. Submittal of survey reports and site forms to SHPO and to the Section 106 Consulting Parties with eligibility determinations, concurrence achieved
4. Submittal of determinations of effect in the Draft EIS for Packages A and B
5. Response to SHPO and consulting parties comments on the effects, documented in the Final EIS
6. Completion of determinations of effect for all packages (A, B and Preferred Alternative)

All Section 106 consulting parties now have the opportunity to review and comment upon the determinations of effect and proposed mitigation measures for all alternatives in the Final EIS. The deadline for comments is September 19, 2011. Any disagreements will be addressed prior to approval of a Record of Decision.

Resolution of adverse effects will be documented in a Programmatic Agreement. Due to the long term nature of implementing the Preferred Alternative, continued consultation will be needed. The Programmatic Agreement will address future consultations and re-evaluation processes as construction projects are funded and designs are refined.

Please let FHWA know if your office has any comments on the determinations of effect and/or would like to be involved in the resolution of adverse effects as a result of this project. If you have any questions or concerns, please notify Monica Pavlik at 720-963-3012.

**RE: North I-25 Final Environmental Impact Statement (CHS#42346)**

Dear Mr. Nichols,

Transmitted with this letter is the Documentation for Finding of Adverse Effect for the Colorado Department of Transportation (CDOT) and Federal Highway Administration (FHWA) North I-25 EIS. The properties that CDOT and FHWA believe will be adversely affected are: the Louden Ditch (5LR.8930), Hingley Farm (5WL.5263), and Jillson Farm (5WL.6564).

The Notice of Availability for the North I-25 Final Environmental Impact Statement (FEIS) will be published on August 19, 2011. Enclosed please find a CD of the entire document. We are providing this information to you under the Section 106 document substitution process. This document will be processed by your office for historic and archaeological resource determination of effects.

In 2003, the CDOT, the Federal Transit Administration (FTA) and FHWA agreed together with your office to substitute the project's National Environmental Policy Act (NEPA) documents (Draft EIS and Final EIS) in lieu of separate documentation, in order to accomplish the Section 106 consultation process on effects. The document substitution process is intended to reduce the time and complexity of the review process involving your office and other Section 106 consulting parties, by providing detailed information about project impacts associated with the various alternatives in the EIS rather than additional documents that may not be as effective for consulting on alternatives.

Since the Draft EIS was approved, the FTA decided to be a cooperating agency instead of a lead agency. The Final EIS includes a preferred alternative, which is a combination of elements from Packages A and B that were evaluated in the Draft EIS. The Final EIS is the documentation used for consultation on the effects of the Preferred Alternative. Previous steps in the document substitution process, as applied for the North I-25 EIS include:

1. Identification of the Area of Potential Effect
2. Identification of properties eligible for inclusion on the NRHP
3. Submittal of survey reports and site forms to SHPO and to the Section 106 Consulting Parties with eligibility determinations, concurrence achieved.
4. Submittal of determinations of effect in the Draft EIS for Packages A and B.
5. Response to SHPO and consulting parties comments on the effects, documented in the Final EIS
6. Completion of determinations of effect for all packages (A, B and Preferred Alternative).

*"Taking Care To Get You There"*

Mr. Edward C. Nichols  
August 11, 2011  
Page 2

All Section 106 consulting parties, along with your office, now have the opportunity to review and comment upon the determinations of effect and proposed mitigation measures for all alternatives in the Final EIS. The deadline for comments is September 19, 2011. Any disagreements will be addressed prior to approval of a Record of Decision.

Resolution of adverse effects will be documented in a Programmatic Agreement. Due to the long term nature of implementing the Preferred Alternative, continued consultation will be needed. CDOT and FHWA request your participation in the development of this Programmatic Agreement which will address future consultations and re-evaluation processes as construction projects are funded and designs are refined.

Please let me know if your office has any comments on the determinations of effect.

If you have any questions or concerns, please notify me at 970-350-2170.

Sincerely,

A handwritten signature in black ink, appearing to read "CH Parr". The signature is written in a cursive, somewhat stylized font.

Dear Mr. Spang:

Transmitted with this letter is the Documentation for Finding of Adverse Effect for the Colorado Department of Transportation (CDOT) and Federal Highway Administration (FHWA) North I-25 EIS. The properties that CDOT and FHWA believe will be adversely affected are: the Loudon Ditch (5LR.8930), Hingley Farm (5WL.5263), and Jillson Farm (5WL.6564).

The Notice of Availability for the North I-25 Final Environmental Impact Statement (FEIS) will be published on August 19, 2011. Enclosed please find a CD of the entire document. Enclosed also is a draft of the Programmatic Agreement that addresses the resolution of adverse effects. We are providing this information to you as a Consulting Party under the Section 106 document substitution process.

In 2003, the CDOT, the Federal Transit Administration (FTA) and FHWA agreed together with the Colorado State Historical Preservation Officer (SHPO) to substitute the project's National Environmental Policy Act (NEPA) documents (Draft EIS and Final EIS) in lieu of separate documentation, in order to accomplish the Section 106 consultation process on effects. The document substitution process is intended to reduce the time and complexity of the review process involving your office and other Section 106 consulting parties, by providing detailed information about project impacts associated with the various alternatives in the EIS rather than additional documents that may not be as effective for consulting on alternatives.

Since the Draft EIS was approved, the FTA decided to be a cooperating agency instead of a lead agency. The Final EIS includes a preferred alternative, which is a combination of elements from Packages A and B that were evaluated in the Draft EIS. The Final EIS is the documentation used for consultation on the effects of the Preferred Alternative. Previous steps in the document substitution process, as applied for the North I-25 EIS include:

1. Identification of the Area of Potential Effect
2. Identification of properties eligible for inclusion on the NRHP
3. Submittal of survey reports and site forms to SHPO and to the Section 106 Consulting Parties with eligibility determinations, concurrence achieved.
4. Submittal of determinations of effect in the Draft EIS for Packages A and B.
5. Response to SHPO and consulting parties comments on the effects for Packages A and B, documented in the Final EIS.
6. Completion of determinations of effect for all packages (A, B and Preferred Alternative).

*"Taking Care To Get You There"*

Mr. Sprang  
August 11, 2011  
Page 2

All Section 106 consulting parties now have the opportunity to review and comment upon the determinations of effect and proposed mitigation measures for all alternatives in the Final EIS. This information is contained in Section 3.15 of the attached CD. The deadline for comments is September 19, 2011. Any disagreements will be addressed prior to approval of a Record of Decision.

Resolution of adverse effects will be documented in a Programmatic Agreement, a draft of which is attached. Due to the long term nature of implementing the Preferred Alternative, continued consultation will be needed.

CDOT and FHWA invite your participation for resolving adverse effects in the Programmatic Agreement (PA) being prepared. If you would like to participate in the preparation of this PA or to be added as a signatory, please contact me.

If you have any questions or concerns, please notify me at 970-350-2170.

Sincerely,

A handwritten signature in black ink, appearing to read "CH Parr".
