

Things are really heating up in July and we're not just talking about the temperature!

Between the celebration for Independence day on Monday, the Thursday concert series and the next phase of construction there will be plenty to keep you occupied in July.

ACC will have two major work activities after we return from the long holiday weekend on Wednesday July 6; Drainage work on SH 62 and reconstruction of Railroad Street.

In preparation for the drainage work on SH 62 ACC paved the shoofly this week and will kick off work activities next Wednesday by restriping the highway. The restriping will shift the traffic away from the excavation that will be occurring on the south side of the road. We will further protect the work zone by placing barrier between the excavation and active lanes on Thursday between the bridge and Liddell Street. Please use caution and patience as you navigate this new configuration.

The second area of focus will be the reconstruction of Rail Road Street. Crews will start with shoulder and ditch work which will require short one-lane closures throughout the week with the goal of moving crews out by 4 p.m. on Thursday to accommodate concert activities. After the cleanup work is complete at Clinton and Cora crews will move down to Rail Road and start grading and drainage work. This may require more significant lane closures.

As you know, we were striving to finish up the intersection of Clinton and Cora before the long weekend. The road work is complete but we still have finish work that will require spot closures within the intersection from 7 a.m. – 5 p.m. with the exception of Thursday (we'll try to clear out by 4 p.m.). The intersection should be complete by Friday with the exception of paving which will now occur July 13th or 14th.

Enjoy Honey Island Swamp Band and Red Haven in the Town Park this upcoming Thursday, July 7. Please encourage residents and visitors to respect the construction signage and fencing as its in place to assure safe passage of the public.
