

1 CRITICAL ISSUES

During the first public meeting, the community told us what their concerns and issues were for the corridor. From that input we developed *A Community Vision for the US 24 Corridor* and combined the comments into nine Critical Issues that needed to be addressed.

9 Critical Issues

1. Needs of multiple users who have multiple objectives
2. Corridor aesthetics
3. Corridor's context and setting
4. Economic viability
5. Surrounding natural and human environment
6. Safety, accessibility and mobility
7. US 24 is a destination and connector to gateways with other destinations
8. Coordinated implementation
9. Effective and fundable solutions
